

Pro Courier is Minnesota's only same day Delivery Service that provides climate controlled small and full sized trucks and vans.

Catering to the needs of our customers that have smaller load requirements for their frozen and refrigerated products, we have established a fleet of smaller temperature controlled vehicles to serve this need.

With the growing concern of many companies in meeting FDA requirements regarding the transportation of poultry, seafood and other frozen and refrigerated products, Pro Courier has quickly reacted to help these companies meet these regulations.

Join the growing list of companies that have switched to Pro Courier. Not only for the excellent service that we provide, but also for the comfort in knowing their refrigerated and frozen products are being handled correctly and arriving at their destinations in the same condition as they were in when they left their location.
